EDUCATION

Bachelor of Technology in Computer Engineering

Dharmsinh Desai University

2022-2026

CPI:8.3

SKILLS

Problem Solving

Critical Thinking

Team Leadership

Collaboration

Team work

Communication

Adaptability

ACHIEVEMENTS

Top 10 Teams – HackOut'24 Hackathon, DAIICT

Participated as Leader of the team "Digital Dreamers" and developed the project Space-Agri-Advisor, which provided satellite-based crop monitoring solutions

6th Rank in DU-HACKS'25

Participated as a solo participant and developed the project TrafficIQ which is a AI-Powered Intelligent Traffic Monitoring System with Future Congestion Control Capabilities

Google Cloud Arcade Facilitator 2024

Achieved the Champion Milestone in the Google Cloud Arcade Facilitator Program 2024

DU-HACKS'23

Certified by DU-HACKS'23 (Hackathon 2023)

SAIF HUSENI

FULL STACK DEVELOPER

ABOUT ME

I'm a passionate Full Stack Developer and Third-Year Computer Engineering student with a curiosity for everything tech. I enjoy learning about emerging technologies and applying my knowledge to build practical, user-friendly solutions. With experience in both front-end and back-end development, I love working on projects that solve real problems and bring ideas to life. My enthusiasm for growth, creativity, and continuous learning drives me to write clean, efficient code and contribute to meaningful software development.

TECHNICAL SKILLS

- Programming Languages:** C, C++, Java, JavaScript, HTML, CSS, C#,python
- Frontend Technologies:** React.js, Tailwind CSS
- Backend Technologies:** Node.js, Express, Django, Spring Boot, .NET Core
- Databases:** MongoDB, SQL (MySQL)
- Tools & Platforms:** Git, GitHub, Postman, Visual Studio Code (VS Code), IntelliJ IDEA
- Core Concepts:** Data Structures & Algorithms (DSA), Database Management Systems (DBMS), Object-Oriented Programming (OOP), Operating System Fundamentals, Software Engineering Principles, Basic Machine Learning Architectures, Computer System Fundamentals

PROJECTS

TrafficIQ

Developed an **AI-powered intelligent traffic monitoring system** focused on **real-time vehicle detection, speed tracking, total vehicle count, and lane-wise traffic analysis**. The system was built using **Python, OpenCV, and YOLOv5** for vehicle detection and tracking. **Integrated external APIs** to fetch live traffic-related data and successfully implemented **congestion prediction** based on real-time insights. Built a **full-stack MERN application** for displaying traffic metrics through a **user-friendly dashboard, allowing real-time visualization and analysis**. The system is designed to support future enhancements like **smart traffic signal optimization** for better urban traffic management.

Video Link: <https://www.youtube.com/watch?v=bCBDezYHlnE>

SafeMind

Developed an **full-stack web application using the MERN stack** that offers mental health assessments (ADHD, Anxiety, Depression, PTSD) and personalized mood tracking. Integrated an **NLP-based ML model** for **real-time mood prediction** from user input, enhancing emotional insights. Implemented **secure JWT authentication** and a **dynamic dashboard** for tailored mental health resources.

Github Repository : <https://github.com/Saifhuseni/SafeMind>

Space-Agri-Advisor

Developed an **innovative application that utilizes satellite data** to deliver precise, **location-specific crop recommendations**, optimizing agricultural practices through detailed soil analysis.

GitHub Repository : <https://github.com/Saifhuseni/Space-Agri-Advisor>

E'zeekart

Developed an e-commerce application called Ezeekart using **Django**, featuring a variety of functionalities to enhance user experience and streamline online shopping.

GitHub Repository : <https://github.com/Saifhuseni/E-Commerce-Django>

SurveyKaro

Developed an **MERN application** that empowers users to **create, manage, and analyze surveys**. This platform **simplifies survey participation and response collection**, making the entire process seamless and user-friendly
